

**RSU 13 – Winter 2011
MEA & NECAP & MHSA Historical Profile – Six Year Average By School & Grade**

Statement Of Purpose & Informational Notes:

This report is intended to provide a continuing format for summarizing historical State of Maine assessment data and performance trends for RSU 13 schools on a year-to-year basis. This report will be updated regularly as assessment data becomes available throughout each academic year. Informational notes that will assist the reader in the interpretation of this data include the following:

1. The **Maine Educational Assessment (MEA)** was administered to all students in grades 3-8 annually until the spring of 2009. This assessment was typically administered in the month of March. The MEA included four performance categories indicating whether students exceeded, met, partially met, or did not meet applicable grade level standards. Consequently, the first three years of data presented below for grades 3-8 are historical MEA results – highlighting the percent of students that either met or exceeded grade level standards.
2. In 2009-2010, the MEA was replaced by a different assessment – the **New England Common Assessment Program (NECAP)**. This assessment is administered in the fall of the year and occurred in RSU 13 for the first time in October of 2009. The NECAP also includes four performance categories indicating whether students are proficient with distinction, proficient, partially proficient, or substantially below proficient relative to applicable grade level standards. Consequently data included in this report for grades 3-8 for the 2009-2010 school year are derived from this initial NECAP administration. For the purposes of this report, the performance categories of '*proficient with distinction*' and '*proficient*' are considered equivalent to exceeding and meeting applicable standards and are reported as such.

In the 2010-2011 testing year, the NECAP included a writing assessment for the first time at grades 5 & 8. Also within this year the South School's 5th grade class was moved to the Rockland District Middle School, consequently reporting for this group of students may be located within page 7 of this updated report.

In the 2011-2012 testing year, 8th grade classes from Rockland District Middle School and Thomaston Grammar School were moved to Oceanside High School West, consequently reporting for this group of students may be located within page 7 of this updated report.

The **Maine High School Assessment (MHSA)** is administered to all 11th graders in the spring of the year – typically in the month of April. This assessment is a combination of the **Scholastic Aptitude Test (SAT)** and supplemental assessments in science and mathematics that are required by the State of Maine. As with grade 3-8 assessments, results are presented highlighting the percent of students either meeting or exceeding applicable grade level standards. Data from the spring 2012 administration of the MHSA will be added to this report when they become available in late summer of 2012.

In the 2011-2012 testing year, 11th grade classes from Georges Valley High School were moved to Oceanside High School East, formerly known as Rockland District High School, consequently reporting for this group of students may be located within page 7 of this updated report.

3. In addition to school data provided for each grade, the State of Maine performance average is also indicated for each comparable level. RSU 13 performance levels that meet or exceed the State of Maine averages are highlighted in yellow.
